# **Academic Program and Course Description Guide**

**2022-2023**

## **Introduction:**

The educational program is a coordinated and organized package of courses that include procedures and experiences organized in the form of

academic vocabulary whose main purpose is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market, which is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program.

The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that are being worked on to acquire for students based on the objectives of the academic program, and the importance of this description is evident because it represents the cornerstone in obtaining program accreditation and is written jointly by the teaching staff under the supervision of the scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the developments and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the description of the academic program circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna track as the basis for their work. In this regard, we can only emphasize the importance of writing a description of academic programs and courses to ensure the proper functioning of the educational process.

## Concepts and terminology:

Academic Program Description: The description of the academic program provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available learning opportunities. It is derived from the description of the program.

Program Vision: An ambitious picture for the future of the academic program to be a sophisticated, inspiring, stimulating, realistic and applicable program.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (semester, yearly, Bologna track) whether it is a requirement (ministry, university, college and scientific department) with the number of study units.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by the student after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty member to develop the student's teaching and learning, and they are plans that are followed to reach the learning goals. That is, describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

### **1. Program Vision**

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

### **2. Program Mission**

Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.

### **3. Program Objectives**

Educational and pedagogical goals

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading

cultural, social, educational and scientific awareness.

#### Future goals

The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized skills that work to elevate society in light of the rapid social changes to which the country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4-Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5-Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6-The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7-Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8-Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

2023-2022/ 1	108HEPS	Sewing foundations (1)	theoretical	practical
				2

#### 8. Expected learning outcomes of the program

##### Knowledge

A- Cognitive objectives

A1- Learn the skill of sewing

A2- Managing groups for practical lessons

A3- The ability to repair and maintain sewing machines

**Skills**

B - The skills objectives of the course

B1 - Artistic and aesthetic skills

B2 - Training skills using the machine

B3 - Speed in mastering skills

**Ethics**

C- Emotional and value goals

C1- Familiarity with the academic subject

C2- Teamwork

C3- The spirit of artistic creativity

**9. Teaching and Learning Strategies**

1 - Explanation and clarification

2- How to make the model

3- Lecture method and practical application

4- Reports

## 10. Evaluation methods

Monthly exams, weekly practical application, and the end-of-year exam.

## 11. Faculty

### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
	Home Economics	Textiles and clothing			Staff	

## Professional Development

### Mentoring new faculty members

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

### Professional development of faculty members

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

## 12. Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

## 13. The most important sources of information about the program

1-Singer - Sewing Encyclopedia : New Sewing Principles, Academia International, Lebanon, 2000

2-Singer - Sewing Encyclopedia Sewing Secrets, Academia International, Lebanon,

2000

3-Singer - Encyclopedia of Sewing: The Art of Detailing, Academia International, Lebanon, 1999

#### 14. Program Development Plan

- Adding modern information to the curriculum
- Practical application of computer models
- Holding training courses
- Approving field visits (laboratories, factories ,..... )
- Use the smart board
- Using data shows to display models

### 10. Course Structure

Week	Hours	Required Learning		Unit or sub name	Learning method	Evaluation	
		Outcomes				method	
	2hours my theory	The student gets to know		Basics of microbiology	Theoretical lectures and practical applications	Daily activity, monthly, quarterly and theoretical tests and exams	
1	2	=		History of microbiology	how it emerged, developed, and applied	Daily activity, monthly, quarterly and theoretical tests and exams	
2	2	=		Bacteria: their shape, arrangement	size, cellular structures, and characteristics	Daily activity, monthly, quarterly and theoretical tests and exams	
3	2	=		Fungi	their general, phenotypic and physiological characteristics	Daily activity, monthly, quarterly and theoretical tests and exams	
4	2	=		Algae	its general and appearance characteristics	Daily activity, monthly, quarterly and theoretical tests and exams	

5	2	=	Elementary school	its phenotypic and physiological characteristics and its applied importance	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
6	2	=	Viruses and phages:	their characteristics, replication, and the diseases they cause	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
7	2	=	Microbial metabolism/	an overview of energy generation and catabolic and anabolic metabolic pathways	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
8	2	=	Growth of microorganisms/	growth methods for estimating the type of microorganisms	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
9	2	=	Factors affecting the growth of microorganisms	: food, heat, air, humidity, osmotic pressure, pH, radiation, and inhibitors	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
10	2	=	Factors affecting the growth of microorganisms	Food, heat, air, humidity, osmotic pressure, pH, radiation, and inhibitors	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam

11	2	=	Nutritional media for microorganisms	composition and types	Daily activity, monthly, quarterly and theoretical tests and exams	Daily mont quart theor tests exam
12	2	=	Pure living farms	types and methods of preservation	Daily activity, monthly, quarterly and theoretical tests and exams	
13	2	=	Control of microorganisms,	physical and chemical methods for sterilization and disinfection	Daily activity, monthly, quarterly and theoretical tests and exams	
14	2	=	Microbiology of water and sewage	tests for potability of water and methods of treating sewage	Daily activity, monthly, quarterly and theoretical tests and exams	
15	2	=	Soil microbiology, air	oxygen, temperature, pH, and osmotic pressure	Daily activity, monthly, quarterly and theoretical tests and exams	
16	2	=	Food contamination with microorganisms	types of microorganisms in foods and sources of food contamination with microorganisms	Daily activity, monthly, quarterly and theoretical tests and exams	
17	2	=	Microbial spoilage of fresh and processed foods Causes of spoilage and factors affecting the types and numbers of microorganisms and types of spoilage of fresh and processed foods		Daily activity, monthly, quarterly and theoretical tests and exams	

13	2	=	Basics of food preservation /	preserving food at high temperatures, low temperatures, reducing moisture content, chemical preservatives, fermentation, and radiation	Daily activity, monthly, quarterly and theoretical tests and exams
14	2	=	Basics of food pr	Preserving food at high temperatures, low temperatures, reducing moisture content, chemical preservatives, fermentation, and radiation.	Daily activity, monthly, quarterly and theoretical tests and exams
20	2	=	Microbiology of fruits and vegetables	sources of pollution and spoilage of fresh fruits and vegetables, and spoilage of processed fruits and vegetables	Daily activity, monthly, quarterly and theoretical tests and exams
21	2	=	Microbiology of grains and their products	sources of pollution and spoilage of grains and their products (cereals, flour, bread	Daily activity, monthly, quarterly and theoretical tests and exams
22	2	=	Microorganisms of sugar and sugar products	types of microorganisms in sugar and spoilage of sugar and its sugar products	Daily activity, monthly, quarterly and theoretical tests and exams
23	2	=	Microorganisms of meat and fish	sources of contamination of meat and fish, types of contaminated microorganisms, spoilage of meat and fish, methods of preserving meat and fish	Daily activity, monthly, quarterly and theoretical tests and exams

24	2	=	Microorganisms of meat and fish	Sources of contamination of meat and fish, types of contaminated microorganisms, spoilage of meat and fish, methods of preserving meat and fish.	Daily activity, monthly, quarterly and theoretical tests and exams
25	2	=	Microorganisms of poultry and eggs	sources of pollution and spoilage of poultry, sources of egg contamination and spoilage	Daily activity, monthly, quarterly and theoretical tests and exams
26	2	=	Microbiology of milk and dairy	products Spoilage of milk and its products (types of milk, cheese and butter)	Daily activity, monthly, quarterly and theoretical tests and exams
27	2	=	Microbiology of milk and dairy	Spoilage of milk and its products (types of milk, cheese, and butter).	Daily activity, monthly, quarterly and theoretical tests and exams
28	2	=	Industrial fermentations	their importance and success factors, lactic, alcoholic and acetic fermentations, production of some important products for industrial fermentations (single-cell protein, enzymes, organic and amino acids, and vitamins)	Daily activity, monthly, quarterly and theoretical tests and exams
29	2	=	Food poisoning,.	its types, food infection, food poisoning, mycotoxin poisoning, disease control, and food poisoning	Daily activity, monthly, quarterly and theoretical tests and exams

	practical part				
the week	hours	Required learning outcomes	Name of the unit/topic	Learning method	Calendar method
	2hours my theory	The student gets to know	Microbiology	Theoretical lectures and practical applications	Daily activity, monthly and quarterly practical tests and exams
1	2	=		General instructions for the laboratory and notes on how to write laboratory reports	
2	2	=		Identifying microbiology laboratory devices and equipment - studying the microscope and its parts and calculating	
3	2	=		Bacteria and their forms, ready-made slides	daily exams every week in the previous subject

4	2	=		Food media, their types and methods of preparation	
5	2	=		Growing microorganisms from the environment on food media in the laboratory	
6	2	=		Colonies: their shapes, types and numbers

### 1. Program Vision

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

### 2. Program Mission

Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.

### 3. Program Objectives

Educational and pedagogical goals

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.

Future goals

The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized skills that work to elevate society in light of the rapid social changes to which the

country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4-Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5-Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6-The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7-Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8-Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

<b>Twenty-third</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>Cleaning and its devices</b>	<b>Actual participation of students in the practical side</b>
<b>Twenty-fourth</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>Cleaning Process Analysis</b>	<b>Explain</b>

<b>Twenty-fifth</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>Electric Cleaners</b>	<b>Actual participation of students in the practical side</b>
<b>Twenty-sixth</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>Hand cleaners and care</b>	<b>Explain</b>
<b>Twenty-seventh</b>	<b>1 Theoretical + 2</b>	<b>The student gets to know</b>	<b>Water in the house sources of processing</b>	<b>Actual participation of students in the practical side</b>
<b>Twenty-eighth</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>Electric, gas and oil heaters</b>	<b>Explain</b>
<b>Twenty-ninth</b>	<b>1 Theoretical +</b>	<b>The student gets to know</b>	<b>The bathroom and its tools and health conditions</b>	<b>Actual participation of students in the practical side</b>
<b>Course Structure</b>				
<b>Week</b>	<b>Hours</b>	<b>Required Learning Outcomes</b>	<b>Unit / Subject Name</b>	<b>Method of education</b>
<b>First</b>	<b>2practical</b>	<b>The student gets to know</b>	<b>Experiments to find out the properties of materials in kitchen utensils</b>	<b>Explain Actual participation of students in the</b>

				cake work in 1- Tinted pots with a shiny base 2-Aluminum	practical side
<b>Second</b>	2 Practical	The student gets to know	Making cakes with pots from Resistant Steel From glass	Explain	
<b>Third</b>	2 Practical	The student gets to know	Knowing the effect of the conductivity of materials in cooking utensils from Aluminum & Steel	Actual participation of students in the practical side	
<b>Fourth</b>	2 Practical	The student gets to know	Pots Connectivity Tefal and Pyrex	Explain	
<b>V</b>	2 Practical	The student gets to know	Using a pressure cooker	Actual participation of students in the practical side	
<b>Sixth</b>	2 Practical	The student gets to know	The effect of a pressure cooker on cooking time	Explain	
<b>Seventh</b>	2 Practical	The student gets to know	Use the grill and know the necessary time	Actual participation of students in the practical side	
<b>Eighth</b>	2 Practical	The student gets to know	The effect of the grill on foodstuffs	Explain	
<b>Ninth</b>	2 Practical	The student gets to know	Comparison of Tefal pots	Actual participation of	

					students in the practical side
X	2 Practical	The student gets to know	Comparison of Tefal utensils and other materials	Explain	
Eleventh	2 Practical	The student gets to know	Effect of voltage on cooking time	Actual participation of students in the practical side	
Twelfth	2 Practical	The student gets to know	Change in the severity of lowness and its effect on the type of food	Explain	
Thirteenth	2 Practical	The student gets to know	Using an electric oven for grilling	Actual participation of students in the practical side	
Fourteenth	2 Practical	The student gets to know	Use of a gas oven for grilling	Explain	
Fifteenth	2 Practical	The student gets to know	First Semester Exam		
Sixteenth	2 Practical	The student gets to know	Maintenance of electrical appliances refrigerator and washing machine	Explain	
Seventeenth	2 Practical	The student gets to know	Maintenance of dishwasher and meat grinders	Actual participation of students in the practical side	
Eighteenth	2 Practical	The student gets to know	Maintenance of gas appliances cooker	Explain	
Nineteenth	2 Practical	The student gets to know	Maintenance of heated gas	Actual participation of students in the	

				appliances	practical side
20 <sup>th</sup>	2 Practical	The student gets to know	Maintenance of oil cooker appliances	Explain	
Twenty one	2 Practical	The student gets to know	Maintenance of heated oil appliances	Actual participation of students in the practical side	
Twenty-second	2 Practical	The student gets to know	Fan maintenance	Explain	
Twenty-third	2 Practical	The student gets to know	Iron Maintenance	Actual participation of students in the practical side	
Twenty-fourth	2 Practical	The student gets to know	Maintenance of the electric mixer	Explain	
Twenty-fifth	2 Practical	The student gets to know	Mill maintenance	Actual participation of students in the practical side	
Twenty-sixth	2 Practical	The student gets to know	Sewing machine maintenance	Explain	
Twenty-seventh	2 Practical	The student gets to know	Maintenance of personal cleaning devices	Actual participation of students in the practical side	
Twenty-eighth	2 Practical	The student gets to know	Vacuum cleaner maintenance	Explain	
Twenty-ninth	2 Practical	The student gets to know	Miscellaneous equipment maintenance	Actual participation of students in the practical side	
Xxx	2 Practical	The student gets to know	End of Semester Exam	Explain

### **Program vision .1**

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility .through various scientific and technical means and methods

### **Program message .2**

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service .competencies to work in the stages of higher education

### **Program objectives .3**

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in science and arts, professionals and members should be

responsible in society, as well as establishing and implementing a system to develop all auxiliary academic programs to contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading .cultural, social, educational and scientific awareness

Expected learning outcomes of the program .8	
Knowledge	
	<p>- Learning Outcomes</p> <ul style="list-style-type: none"> <li>• A1- Enabling the student to recognize the types and branches of life science and the importance of each branch</li> <li>• A2- Identify the components involved in the composition of living matter, what this substance is, and its importance</li> <li>• A3- Providing the student with cognitive information about the tissues that make up the organs of a living organism</li> <li>• A4- Identify the most important inorganic elements that make up the organs of an organism's body and the extent of their importance for the body's continued performance of vital functions</li> </ul>
Skills	
	Developing the skill of linking acquired - knowledge with practical application

	Developing the skill of conducting research and .reports and drawing conclusions				
	Developing the skill of planning and designing - applied activities				
<b>Value</b>					
	Developing students' abilities to share ideas				
	Decision-making skill and developing constructive dialogue experience				
<b>Teaching and learning strategies .9</b>					
Explaining the scientific material and linking the lectures to the practical part					
Using a microscope and pictures that remind the student of the scientific material					
<b>Evaluation methods .10</b>					
.Semester tests -1					
Daily activities and end-of-year exams -2					
.Research, reports and working papers -3					
<b>The teaching staff .11</b>					
<b>Faculty members</b>					
Preparing the teaching staff		Requirements/skills (if (any	Specialization		Scientific rank

	staff		Food and nutrition	Home Economics	Teacher
	staff		Microbiology	Life sciences	Teacher

**Professional development**

**Orienting new faculty members**

Briefly describes the process used to orient new, visiting, full-time, and part-time .faculty at the institution and department levels

**Professional development for faculty members**

Briefly describe the academic and professional development plan and arrangements for faculty members such as teaching and learning strategies, assessment of learning .outcomes, professional development, etc

**Acceptance criterion .12**

Developing regulations related to admission to the college or institute, whether central ) (admission or others mentioned

**The most important sources of information about the program .13**

.Remember briefly

**Program development plan .14**

A comparative study by introducing the student to the ability to identify the types of tissues found in nature as well as learning about the types of plant tissues

**Course objectives .8**

Objectives of the study  
subject

- A1- Enabling the student to recognize the types and branches of life science and the importance of each branch •
- A2- Identify the components involved in the composition of living matter, what this substance is, and its importance •
- A3- Providing the student with cognitive information about the tissues that make up the organs of a living organism •
- A4- Identify the most important inorganic elements that make up the organs of an organism's body and the extent of their importance for the body's continued performance of vital functions •
- .... •
- .... •

## Teaching and learning strategies .9

The strategy

**Education strategy, collaborative concept planning-1**

**Education strategy brainstorming -2**

**Education Strategy Notes Series -3**

## Course structure .10

the week	hours	Required learning outcomes	Name of the unit or topic	Learning method	Evaluation method
	1 theoretical hour	The student gets to know you	Basics of general biology	For the student to know Biology, its branches, and its relationship with other . sciences	Daily activity, monthly, quarterly and theoretical tests and exams
1	1	=	The differences between animals and plants, the method of research in science the method of ) experimental scientific research and the role of the Arabs in its discovery and .(development	For the student to learn about the most important differences between animal and plant organisms and to become familiar with the experimental research .method	Daily activity, monthly, quarterly and theoretical tests and exams
2	1	=	Chemistry of living matter - primary and secondary elements in the body, organic compounds in living .organisms	For the student to learn about the elements that make up the bodies of living .organisms	Daily activity, monthly, quarterly and theoretical tests and exams
3	1	=	Other necessary compounds in living .matter	For the student to learn about the components of .living matter	Daily activity, monthly, quarterly and theoretical tests and exams
4	1	=	Cell, cell definition, cellular theory, cell components, cell wall, plasma membrane, internal endoplasmic reticulum, ribosomes, energy houses .(mitochondria)	For the student to know what a cell is and the most .important organelles in it	Daily activity, monthly, quarterly and theoretical tests and exams
5	1	=	Golgi complex, lysosomes, nucleus, .plastids, vacuoles	For the student to learn about the functions of the .organelles present in the cell	Daily activity, monthly, quarterly and theoretical tests and exams
6	1	=	Fibrils and microstructures, comparison between plant and animal cells, cell shapes and .sizes, cell division	For the student to learn about the function of fibrils and microorganisms and the difference between animal .and plant cells	Daily activity, monthly, quarterly and theoretical tests and exams

7	1	=	Animal tissues	For the student to learn about the types of animal .tissues	Daily activity, monthly, quarterly and theoretical tests and exams
8	1	=	Plant tissue	For the student to learn about the types of plant tissues	Daily activity, monthly, quarterly and theoretical tests and exams
9	1	=	Nutrition and digestion in biology, food materials, and feeding methods, animal nutrition, .saprophytic nutrition	For the student to learn about the nutritional methods of primitive and .advanced organisms	Daily activity, monthly, quarterly and theoretical tests and exams
10	1	=	Parasitic nutrition, photosynthesis, digestion and the human digestive .system	For the student to learn about the nature of parasitic nutrition, photosynthesis in plants, and digestion in .humans	Daily activity, monthly, quarterly and theoretical tests and exams
11	1	=	Parasitic nutrition, photosynthesis, digestion and the human digestive .system	So that the student learns how to complete the process of absorption and .representation	Daily activity, monthly, quarterly and theoretical tests and exams
12	1	=	Transport, the importance of transport, transport in plants, transport in animals, blood (blood groups, blood .(transfusion	For the student to learn about how nutrients and fluids are transported in plants as well as in animals, .and to identify blood types	Daily activity, monthly, quarterly and theoretical tests and exams
13	1	=	Blood sugar concentration, physical balance, the role of the liver in .physical balance	For the student to learn how to maintain physical balance and blood sugar .concentration	Daily activity, monthly, quarterly and theoretical tests and exams
14	1	=			Daily activity, monthly, quarterly and theoretical tests and exams
	1			.Semester exam	
15	1	=		Half year holiday	
16	1	=	Hormones, animal .hormones	For the student to learn about hormones, their types .and functions	Daily activity, monthly, quarterly and theoretical tests and exams
17	1	=	.Plant hormones	For the student to learn	Daily activity,

				about the most important .plant hormones	<b>monthly, quarterly and theoretical tests and exams</b>
18	1	=	Reproduction, the importance of reproduction, asexual reproduction, sexual reproduction, the importance of sex in .biology	For the student to know the .types of reproduction	Daily activity, monthly, quarterly and theoretical tests and exams
19	1	=	The human .reproductive system	For the student to learn about the human .reproductive system	Daily activity, monthly, quarterly and theoretical tests and exams
20	1	=	The male reproductive system, the female reproductive system, the role of hormones in reproduction, hormones and the menstrual cycle, fertilization and fetal .growth	For the student to learn about the components of the male and female .reproductive system	Daily activity, monthly, quarterly and theoretical tests and exams
21	1	=	Childbirth, pregnancy tests, the problem of family planning and procreation, human .sexual behavior	For the student to learn about the types of tests used .to detect pregnancy	Daily activity, monthly, quarterly and theoretical tests and exams
22	1	=	Heredity, the importance of genetics, chromosomes, Mendel's first law , .Mendel's second law	For the student to learn about genetics and the most .important genetic laws	Daily activity, monthly, quarterly and theoretical tests and exams
23	1	=	Determining sex, heredity and environment, chromosomal abnormalities in humans and some .genetic diseases	For the student to learn about the types of genetic .diseases	Daily activity, monthly, quarterly and theoretical tests and exams
24	1	=	Organic evolution and the origin of life, an introduction to the theory of organic evolution and its .evidence	For the student to learn about the theory of .evolution	Daily activity, monthly, quarterly and theoretical tests and exams
25	1	=	Natural selection and the emergence of diversity, the origin and development of .life on Earth	For the student to learn about the theory of natural .selection	Daily activity, monthly, quarterly and theoretical tests and exams
26	1	=	Environment and pollution, the concept of ecology, ecosystems and their elements,	For the student to become familiar with the scientific .concept of the environment	Daily activity, monthly, quarterly and theoretical tests and exams

			terrestrial environment, aquatic environment, and atmospheric environment		
27	1	=	Food chains and their relationship to energy, energy and its sources, limits and laws of tolerance, the law of minimum tolerance , Shelford's law of endurance	For the student to learn about food and energy chains	Daily activity, monthly, quarterly and theoretical tests and exams
28	1	=	Biogeochemical cycles, carbon cycle, sulfur cycle, environmental pollution and its dangers, population problems and man's relationship with the environment	For the student to learn about the most important cycles found in nature	Daily activity, monthly, quarterly and theoretical tests and exams
29	1	=	Behavior, definition of behavior and its types, innate behavior, biased behavior, instinctive behavior, inherited behavior, acquired (educational) behavior, behavioral relationships and social development in humans	For the student to learn about the types of behaviors in living organisms	Daily activity, monthly, quarterly and theoretical tests and exams
30	1	=	Human and public health, child health and care, foundations of public health and its requirements	To familiarize the student with the foundations of public health	Daily activity, monthly, quarterly and theoretical tests and exams
<b>prac tical part</b>					
the week	hours	<b>Required learning outcomes</b>	<b>Name of the unit/topic</b>	<b>Learning method</b>	<b>Calendar method</b>
	working 2 hours	The student gets to know	biology	Theoretical lectures and practical applications	Daily activity, monthly and quarterly practical tests and exams
1	2	=		General instructions for the laboratory and notes on how to write laboratory reports	
2	2	=		Identifying biology laboratory devices and equipment - studying the microscope and its parts	

3	2	=			
4	2	=		Differences between animals and plants Discuss the differences between animals and plants Comparative examination of animal cells and plant cells	
5	2	=		Microscopic study of plant cell structure using an optical microscope A microscopic study of the structure of an animal cell using an optical microscope	
6	2	=		Discussing the cellular structure under the electron microscope by displaying slides and pictures that show the wall, cytoplasm, plasma ) membrane, rough and smooth endoplasmic reticulum, ribosomes, mitochondria, lysosomes, nucleus, plastids, vacuoles, fibrils and microbodies	
7	2	=		Cell division (examination of prepared slides), direct division, indirect division	
8	2	=		Cell division (examination of prepared slides), meiosis	
9	2	=		Tissues (examination of prepared slides), plant tissues, their division, and their characteristics	
10	2	=		Tissues (examination of prepared slides), animal tissues, their division, and characteristics	
11	2	=		Extracurricular activity: a visit to see the electron microscope and learn about the technique of using it	
12	2	=		General review of previous laboratories and discussion	
13	2	=		<b>Semester exam</b>	<b>Semester exam</b>
14	2	=		Nutrition and digestion in living organisms, methods of :nutrition in animals A. Shot feeding. B. Parasitic nutrition Digestion experiments with saliva, digestion experiments using acids	
15	2	=		Nutrition and digestion in biology, anatomy of the digestive system cycles in a mammal	

16	2	=		Transport, experiments on the transfer of sap in plants, diffusion experiments, .osmosis experiments	
17	2	=		<b>Half year holiday</b>	
18	2	=		Blood (composition of blood and its cells), examination of prepared slides, examination of the composition of liver tissue cells, examination of .prepared slides	
19	2	=		Hormones, experiments on the effect of plant hormones .on plant growth	
20	2	=		Reproduction, asexual reproduction, examination of prepared slides Sexual reproduction, examination of prepared .slides	
21	2	=		Reproduction, anatomy of the cycles of the reproductive system in a .mammal	
22	2	=		Genetics, chromosomes, examination of ready-made .slides	
23	2	=		.Environment and pollution Study some of the devices used in environmental .studies	<b>Daily exams throughout the year</b>
24	2	=		Environment and pollution (extracurricular . (activity An environmental scientific trip and a visit to a factory to learn about methods of treating .pollution	
25	2	=	<b>General Review</b>		
26	2	=	<b>Final practical exam</b>		

**Course evaluation .11**

Grade distribution of 25 marks for monthly and daily exams for the first semester.  
 .marks for the second semester, including daily and monthly exams 25

**Learning and teaching resources .12**

**Approval of the Dean**

### **15. Program Vision**

The College of Education for Girls seeks to graduate academically and pedagogically qualified teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

## 16. Program Mission

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education.

## 17. Program Objectives

1-- Preparing qualified cadres to work in the educational field with high efficiency, offering postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-- Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to developing various aspects of the educational system in Iraq

4- Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency

5- Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular

## 18. Program Accreditation

Nothing

## 19. Other external influences

nothing

## 20. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution				Basic

<b>Requirements</b>				<b>course</b>
<b>College Requirements</b>	<b>yes</b>			
<b>Department Requirements</b>	<b>yes</b>			
<b>Summer Training</b>	Non applicable			
<b>Other</b>				

\* This can include notes whether the course is basic or optional.

<b>21. Program Description</b>				
<b>Year/Level</b>	<b>Course Code</b>	<b>Course Name</b>	<b>Credit Hours</b>	
<b>2022-2023/ Second stage</b>	219 HE CBF / CBF)	<b>Food chemistry</b>	<b>theoretical</b>	<b>practical</b>

<b>22. Expected learning outcomes of the program</b>	
<b>Knowledge</b>	
1- The student will acquire the ability to name and classify food compounds	3- The student will learn how to apply the foundations of biochemistry in the food and chemical industries.
2- Acquire the student to explain the interactions of food groups	4- The student knows how to conduct laboratory experiments
<b>Skills</b>	
1- Identify the most important standards and devices used in food analysis	2- The ability to present and discuss results in scientific ways
3- Gaining the ability to	4- The ability to discuss the results

conduct laboratory experiments	
<b>Ethics</b>	
1- Conclusion and evaluation	2- Observation, perception and thinking
3- Implementation and evaluation	

### 23. Teaching and Learning Strategies

- 1- Explanation of the scientific material and practical application.
- 2- Writing a report on the practical part that was applied in the laboratory.
- 3- Interpreting and discussing the results in a scientific manner.

### 24. Evaluation methods

Weekly, monthly, daily exams and the end of the year exam.

### 25. Faculty

#### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
1- Asist .prof Wedad fadhil abas	Home Economic	Food and nutrition			Faculty	
2- Asist.prof.Alyaa saad abdulrahman	Home Economic	Food and nutrition			Faculty	
3- Weaam abdulwahid	Chemistry Science	Chemistry Science			Faculty	

### Professional Development

### **Mentoring new faculty members**

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

### **Professional development of faculty members**

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

### **26. Acceptance Criterion**

**(Setting regulations related to enrollment in the college or institute, whether central admission or others)**

### **29. Program Vision**

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

### **30. Program Mission**

Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.

### **31. Program Objectives**

Educational and pedagogical goals

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.

Future goals

The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized skills that work to elevate society in light of the rapid social changes to which the country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4-Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5-Keeping pace with scientific and technological developments in the educational

fields in general, and the field of teacher preparation in particular.

6-The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7-Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8-Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

1. Program Vision

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility through various scientific and technical means and methods.

2. Program Mission

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education.

3. Program Objectives

- Preparing qualified cadres to work in the educational field with high efficiency, offering postgraduate programs in the various educational specializations at

the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2- Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent

-3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4- Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5- Keeping pace with scientific and technological developments in the educational fields in general, and

the field of teacher preparation in particular.

6- The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

### 1. Program Vision

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

### 2. Program Mission

Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.

### 3. Program Objectives

Educational and pedagogical goals

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.

Future goals

The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized skills that work to elevate society in light of the rapid social changes to which the

country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4-Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5-Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6-The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7-Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8-Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

## Course Description Form

1. Course Name:	
Food preparation	
2. Course Code:	
214HEFR	
3. Semester / Year:	
yaerly	
4. Description Preparation Date:	
10/24/2023	
5. Available Attendance Forms:	
Presence	
6. Number of Credit Hours (Total) / Number of Units (Total)	
60 hours per year, 2 hours working	
7. Course administrator's name (mention all, if more than one name)	
Name: maha mohammed nafi ali  .....	
Email:maha .....	
8. Course Objectives .....	
<b>Course Objectives</b>	Subject scorer 1- Students' knowledge of the sources of different foods, how to choose them, and methods of storing and preserving them for the longest possible time. 2- Identify nutritional value, such as foods, integrated commandments, proper nutrition, and their relationship to health 3- Teaching female students how to prepare balanced meals 4- Preparing capable and proficient female graduate students in the field of food and nutrition to be future mothers, as well as to enable them to work in various fields such as hospitals, in the field of tourism, or in the teaching profession.
9. Teaching and Learning Strategies	

<b>Strategy</b>	Exam and reports
-----------------	------------------

### 10. Course Structure

Week	Hours	Required Learning	Unit or subject name	Learning method	Evaluation
1	2	For the student to know	Get to know the curriculum vocabulary comprehensively and link this vocabulary with previous information from the first year	Method of explanation and lecturing	Conducting practical and theoretical tests Monthly with reports
2	2	=	Measurement, measuring the weights of dry and liquid materials, applying a recipe	=	=
3	2	=	Fruits and vegetables, ways to cook them, how to preserve their nutritional value, the effect of acids and bases on the color, taste, and composition of some vegetable dishes such as tabbouleh and dolma.	=	=
4	2	=	Salads, preparing different types and preparing different types of sauces (French sauce and mayonnaise)	=	=
5	2	=	Milk, apply some of the conco correct way to k		
6	2	=	Eggs, preparing eggs in the shell (b in custard), determinin		=
7	2	=	Determine the effect of temperature and time on cooked custard.	=	=
8	2	=	. Using eggs in food dishes, taking advantage of the egg-beating and fluffing feature	=	=
9	2	=	Sherbet, making orange sherbet and how to preserve it for a long time.	=	=

10	2	=	<b>Fats, their uses in the kitchen, a temperature.</b>	=	=
11	2	=	<b>Apply some recipes for frying with plenty of fat and little fat</b>	=	=
12	2	=	<b>Using fat to prepare some permanent mayonnaise and French sauce.</b>	=	=
13	2	=	<b>Meat, application of meat preparation methods</b>	=	=
14	2	=	<b>Prepare different recipes from meat.</b>	=	=
15	2	=	<b>First semester exam</b>	=	=
16	2	=	<b>Sugars, make some simple chocolate.</b>	=	=
17	2	=	<b>Starches, their identification and uses. The use of starch as a thickening agent for some dishes</b>	=	=
18	2	=	<b>The effect of acid and sugar on thickening the starch mixture.</b>	=	=
19	2	=	<b>Flour, cereals and bread</b>	=	=
20	2	=	<b>Preparing gluten balls using different types of flour with some recipes.</b>	=	
21	2	=	<b>Fluffing agents, using water vapor as a fluffing agent, using carbon dioxide as a fluffing agent.</b>		=
22	2	=	<b>Using soda with acids from foods as a fluffing agent, giving some characteristics for each case.</b>	=	=
23	2	=	<b>. Dough and pies, examples of liquid dough types.</b>	=	=
24	2	=	<b>Biscuits and the factors affecting them, making models of biscuits.</b>	=	=
25	2	=	<b>Cake, both fatty and fat-free</b>	=	=
26	2	=	<b>Paneling, its types, making decorative paneling for different models.</b>	=	=
27	2	=	<b>Making various types of cake and pastry fillings</b>	=	=
28	2	=	<b>Natural and artificial baits and flavors, their origin and role in food preparation.</b>	=	=
29	2	=	<b>Drinks of all kinds, details about tea, coffee, and cocoa and how</b>	=	=

			to make them the right way		
30	2	=	End of semester exam	=	=

**57. Program Vision**

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

**58. Program Mission**

Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.

**59. Program Objectives**

Educational and pedagogical goals

The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to

community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.

#### Future goals

The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized skills that work to elevate society in light of the rapid social changes to which the country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4- Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5- Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6- The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7- Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8- Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at

the regional, Arab, and national levels as well.

### 64. Expected learning outcomes of the program

#### Knowledge

A- Cognitive objectives

- 1- Identify some correct and incorrect terms and concepts regarding clothing
- 2- Recognizing the importance of clothing for the individual and society, especially young people
- 3- Identify the clothing of special groups, including the disabled, children and the elderly
- 4- Recognizing the importance of clothing from a health, personal, social, and other perspective
- 5- Learn about the rules and foundations of fashion design-
- 6-Learn about the skill of sewing by designing and implementing some clothing pieces

#### **Skills**

##### **B - The skills objectives of the course**

- 1- Developing the student's ability to transform information into methods of work and activity in the educational field
- 2- Developing the student's ability to study the groups of society and how to deal with them in terms of choosing appropriate clothing
- 3- Developing the student's ability to choose the optimal fabric and its suitability for the garment being executed
- 4- Developing the student's ability to protect him as a consumer

#### **Ethics**

##### **C- Emotional and value-based goals**

- C1-Work actively and effectively
- C2- The ability to manage time and motivate others
- C3- The ability to expand awareness in choosing the appropriate design

#### **65. Teaching and Learning Strategies**

- 1- Giving theoretical lectures

2- Lecture method and practical application

## 66. Evaluation methods

1-Practical tests

2-Theoretical tests

3- Extracurricular activities

## 1- Faculty

### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
	Home Economics	Textiles and clothing			Staff	

## Professional Development

### Mentoring new faculty members

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

### Professional development of faculty members

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

## 2- Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

## Course Description Form

58. Course Name:

Family clothes

59. Course Code:

325 HE FC

60. Semester / Year:

yaerly

61. Description Preparation Date:

6/10/2023

62. Available Attendance Forms:

Presence

63. Number of Credit Hours (Total) / Number of Units (Total)

90 hours per year, 3 hours per week

64. Course administrator's name (mention all, if more than one name)

Name: Prof. Shahba Kazal Diab

teacher. Yusra Shakir Muhammed Jawad

Email: [yusra\\_20002001@coeduw.uobaghdad.edu.iq](mailto:yusra_20002001@coeduw.uobaghdad.edu.iq)

65. Course Objectives

Course Objectives

Identifying the importance of clothing for the individual and society from a health and social standpoint, and methods choosing appropriate clothing according to customs, traditions, and body shapes, based on the foundations and rules of design, in addition to identifying clothing, the consumer, and ways to protect him through the special instruction card in caring for fabrics, clothing, and furnishings .

66. Teaching and Learning Strategies

- 1- Giving theoretical lectures
- 2- Lecture method and practical application

<b>10. Course structure / Theoretical</b>					
<b>the week</b>	<b>hours</b>	<b>Required learning outcomes</b>	<b>Name of the unit/topic</b>	<b>Teaching method</b>	<b>Evaluation method</b>
The first and second weeks	1 hours	The student learns about the importance of clothing for the individual and society	The importance of clothing for the individual and society	a lecture	Theoretical achievement test
The third and fourth weeks	1 hours	The student learns about the importance of clothing for female students in the Home Economics Department	The importance of clothing for female students in the Home Economics Department	a lecture	Theoretical achievement test
The fifth and sixth weeks	1 hours	The student learns how to choose fabrics, the uses of fabric, the need for purchase, and the price of fabric	Selection of fabrics, uses of fabric, need for purchase, and price of fabric	a lecture	Theoretical achievement test
The seventh and eighth weeks	1 hours	The student learns about choosing fabrics, estimating the quantity to be purchased, and the quality of the fabric	Choosing fabrics and estimating the quantity to be purchased and the quality of the fabric	a lecture	Theoretical achievement test
The ninth and tenth weeks	1 hours	The student learns about international symbols to explain the care of fabrics, garments and furnishings	Universal symbols to illustrate the care of fabrics, garments and upholstery	a lecture	Theoretical achievement test
The eleventh and twelfth weeks	1 hours	The student learns about children's clothes	Children's clothing	a lecture	Theoretical achievement test

The thirteenth and fourteenth weeks	1 hours	The student learns about children's clothing designs	Children's clothing designs	a lecture	Theoretical achievement test
The fifteenth and sixteenth weeks	1 hours	The student learns about the foundations of clothing design, proportion, and balance	Fundamentals of design in clothing, proportion, and balance	a lecture	Theoretical achievement test

**English Language 3<sup>rd</sup>**

**English Language (Asst.Lect. Hiba Ahmed Kareem)**

**heba.a@coeduw.uobaghdad.edu.iq**

**Academic Year (2022/2023)**

**Syllabus**

This course emphasizes the development of fluency and intelligibility in spoken English. Through individual and group activities, students work on improving pronunciation, practicing conversation strategies and delivering oral presentations.

1. Institution Name	University of Baghdad
2. Department Name	College of Education for Women \Department of Home Economics
3. Course Code & Name	English Language
4. Lecture Type	Classroom
5. Semester/Year	Annual System
6. No. of credit hours	30
7. Instructor Name	Assist. Lec. Hiba Ahmed Kareem

## 8. Course Objectives

1. Develop the linguistic competence that enables them to be aware of the cultural, economic and social issues of their society in order to contribute in giving solution. to enable the learner to communicate effectively and appropriately in real life situation.

2. Acquire the linguistic bases that enable them to participate in transferring the scientific and technological advances of other nations to their nation.

3. Develop their awareness of the importance of English as a means of international communication.

4. To enable the learners to communicate effectively in real life.

## 9. Student Learning Outcomes, Teaching/Learning Methods, and Assessment

**A. Knowledge Outcomes:** Upon completion of the course, students should be able to:

1. Acquire basic language skills (listening, speaking, reading and writing) in order to communication with speakers of English language.
2. Develop their intellectual, personal and professional abilities
3. Acquire the linguistic competence required in different professions
4. Develop positive attitudes towards learning English.

**B. Skills Outcomes:** Upon completion of the course, students should be able to manage:

1. Listening
2. Speaking
3. Reading
4. Writing

### Teaching/learning methods

1. Lectures.
2. Class problem solving.
3. Discussion

### Assessment methods

1. homework problem sets,
2. exams
3. quizzes

C. Affective value outcomes: Upon completion of the course, students should be able to apply:

1. best methods to study natural sciences
2. Critical Thinking
3. Analytical methods in solving problems

### Teaching/learning methods

1. Brain storming
2. Encourage Critical thinking
3. Encourage analytical thinking strategy
4. Introduce correct research methodologies

### Assessment methods

1. Exams
2. Student feedback
3. body language
4. laboratory reports / studies

D. Life learning outcomes: Upon completion of the course, students should be able to:

1. Work within teams
2. Write academic reports
3. Plan and organize time of study
4. Initiate new ideas and motivate others
5. Conduct targeted searches of scholarly literature.

## 10. Course Content

Week No.	No. of hours	Reference	Topic
1	1	Headway Plus for Intermediate	Unit 1- Getting to Know You
2	1		Present tense, simple past, present perfect
3	1		Reading (Wonders of the Modern World), Informal Speeches
4	1		Present Simple and Continuous, Passive
5	1		Sports events, Dates & Numbers, SMS & Emails
6	1		Art and literature, reading (illustrator and writer)
7	1		Binding and permitting, demand and supply
8	1		Nationalities and countries - reading (how to behave tactfully when traveling)
9	1		Forms of expression for the future: going to—will – present continuous
10	1		Weather Forecast Description, Read (My Vacation Type), How to Reserve
11	1		Interrogative forms using like ,
12	1		signals and sounds,
13	1		Review the first six units
14	1		Exam
15	1		Present Perfect and Past Simple, Passive Present Perfect
16			If conditional cases, types of adjectives,
17	1		Suggestions, Reading
18	1		Probability formulas: must, could, might, can't, must

			have, could have, might have, can't have
19	1		Personality traits, agreement and difference, reading
20	1		Present Perfect Continuous, Time Expressions, Compound Nouns
21	1		Quantity Express, Reading
22	1		Information Exchange, CV Writing
23	1		Indirect question, short questions, Terminology
24	1		Informal English, Reading (How much do you know about your world),
25	1		Transmitted speech, transferred question, orders and requests transmitted
26	1		Apologies Read
27	1		Birth, marriage and funeral customs
28	1		Review unit 1-6
29	1		Review unit 6-14
30	Exam		

## 11. References

1. Textbooks	Intermediate New Headway Plus By: John Soars & Liz Soars
2. References	- Alexander, L G. Developing Skills: Student's Book (New Concept English)
3. Recommended readings	Raymond, Murphy. English Grammar in Use (2nd ed.). Cambridge University Press.  Quirk, R. et.al. (1972). A Comprehensive Grammar of English. London: Longman.
4. Electronic/ Online references	Google Books  Google Scholar

## 12. Course improvement plan

1. Frequent reviews for the curriculum.
2. Attending Conferences of Developing English Language.
3. Using modern techniques for learning English Language.
4. Overcoming the difficulties that the students face through making them managing different situations in English Language.

1. Program Vision
<p>The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.</p>
2. Program Mission
<p>Preparing female students in line with scientific and technical progress and preparing qualified cadres who possess continuing competencies and community service competencies to work in the stages of higher education.</p>
3. Program Objectives
<p>Educational and pedagogical goals</p> <p>The college aims to raise good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations and skills, develop innovative capabilities and train her to use the scientific method of thinking to confront problems and solve them. This is in addition to preparing and building female students to play a positive role in the field of scientific research, which contributes In the field of scientific progress in the sciences and arts, professionals and members should be responsible in society, as well as establishing and implementing a system to develop all academic programs to help contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.</p> <p>Future goals</p> <p>The College of Education for Girls seeks to be a leader in preparing female teachers by relying on the latest research in education and providing scientific expertise that provides students with the necessary knowledge and specialized</p>

skills that work to elevate society in light of the rapid social changes to which the country is exposed, and to preserve them to develop the meaning of teaching, learning and scientific research. And community service.

The college also aims, through its programs and activities, to achieve the following:

1- Preparing qualified cadres to work in the educational field with high efficiency, presenting postgraduate programs in the various educational specializations at the college, updating them to serve development plans, keeping pace with scientific and technical progress and interacting positively with current developments in the educational, academic and cultural programs of colleges of education in universities in neighboring countries and abroad.

2-Developing the educational process and encouraging research and self-learning for female students so that they can carry out their duties to the fullest extent.

3- Modernizing the college's educational programs, providing educational qualification for university teachers, and contributing to the development of various aspects of the educational system in Iraq.

4-Keeping pace with global and regional developments in the courses and programs offered by the college, in order to achieve internal efficiency.

5-Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6-The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7-Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8-Developing new programs at the bachelor's and master's levels and preparing

projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

			2	2

### 8. Expected learning outcomes of the program

Knowledge

-Identifying the factors that lead to food spoilage or spoilage and how to prolong its life and preserve nutrients while maintaining food safety and quality.

Learning Outcomes 2  
2- Identify the methods of final sterilization of canned foods and the tools used in that.

Learning Outcomes 3  
3- Identify the different packaging materials and containers used to preserve food and the advantages and disadvantages of each.

Learning Outcomes 4  
4- Identify the different packaging materials and containers used to preserve food and the advantages and disadvantages of each.

Learning Outcomes 5  
5- Learn about modern methods of food preservation.

Learning Outcomes 5  
Learning Outcomes Statement 5

---

Skills

- 1 - Developing students' skills in preparing food and preserving food with different preservation methods.
  - 2 - Developing students' experiences and skills in preparing food and preserving it for a longer period.
  - 3- Developing the student's skill in how to preserve food at home and how to deal with corruption factors.
- 

**15. Teaching and Learning Strategies**

---

- 1- Method of explanation and clarification
  - 2- Discussion method
  - 3- Lecture method and scientific application
- 

**16. Evaluation methods**

Monthly exam, practical application and reports

### 67. Program Vision

The college seeks to graduate academically and educationally qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

### 68. Program Mission

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education and respond to the requirements of the labor market.

### 69. Program Objectives

1. Embodying the vision, mission and goals of the University of Baghdad, and applying the best educational practices with a focus on ensuring and enhancing quality and performance.
2. Preparing specialized cadres capable of serving the community and preparing for the preparation of future specializations.
3. Spreading the culture of human diversity in society, transferring knowledge and skills, writing academic research, and creative scientific achievement through student- and teaching-focused activities.

4. The college seeks to conclude scientific and cultural cooperation agreements with corresponding colleges and corresponding departments in different colleges to achieve best practices in the fields of teaching, learning and translation.

5. Focusing on the educational and moral aspects of all its members and spreading the spirit of dedication, tolerance, commitment and work to serve the nation.

### 70. Program Accreditation

Does the program have program accreditation? And from which agency?

### 71. Other external influences

Is there a sponsor for the program?

### 72. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements				Basic course
College Requirements	Yes			
Department Requirements	Yes			
Summer Training	None			
Other				

\* This can include notes whether the course is basic or optional.

### 73. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
2023-2024 / the Third	HEFR 332		theoretical	practical
		Family relations	2hours	

74. Expected learning outcomes of the program	
<b>Knowledge</b>	
-Informing students about the importance of family relationships - -Familiarity with the theories that explained family social relationships  - Students know the types of families	- Identifying the most important problems that hinder the family from performing its functions and that lead to its disintegration
<b>Skills</b>	
- Expanding the skill of dealing with all individuals within the family  - She becomes able to solve the problems she faces in the family	
<b>Ethics</b>	
-Developing students' abilities to share ideas and opinions.	- Students gain the ability to form social relationships within and outside the family

### 75. Teaching and Learning Strategies

- Explaining the scientific material through the lecture.
- Writing a review paper for the most important ideas presented during the lectures
- Self-learning

### 76. Evaluation methods

Daily, weekly, monthly exams and the end of the year exam.

Preparing reports related to the material

### 77. Faculty

#### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Professor	Home Economics	Educational Psychology			Staff	

#### Professional Development

##### Mentoring new faculty members

Attending theoretical and practical lessons as an assistant teacher with the subject professor to gain experience

##### Professional development of faculty members

Attending scientific courses and workshops

### **78. Acceptance Criterion**

**(Setting regulations related to enrollment in the college or institute, whether central admission or others)**

### **79. The most important sources of information about the program**

State briefly the sources of information about the program.

### **80. Program Development Plan**

- Continuously updating the curriculum and keeping pace with scientific progress
- Using Data Show in presentation and using the electronic computer.
- Encouraging students to present, deliver, and group discussions

## 1. Program Vision

The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility through various scientific and technical means and methods.

## 2. Program Mission

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education.

## 3. Program Objectives

1- Preparing distinguished cadres to work in the educational field, most notably, graduate programs in the various educational specializations, and updating them, including the conclusion of developmental excellence, keeping pace with progress and technology and positive interaction while controlling the various scientific and academic educational programs of colleges of education in universities in neighboring countries and abroad.

2- Developing the educational methodology and encouraging research and self-learning for female students so that they can fulfill their duties to the fullest extent.

3- Modernizing the college's educational programs, to support the educational qualification of university scholars, and the trend in developing the educational understanding of various applicants in Iraq.

4- Watch for universality and minority regarding the college's offering of courses and beyond, in order to achieve what is necessary internally.

5- Keeping pace with scientific and technological developments in the educational fields in general, and the field of teacher preparation in particular.

6- The college's contribution to providing the necessary competencies to the local community for those holding higher degrees (master's and doctorate) in various educational specializations.

7- Developing and evaluating the new study plan for the bachelor's degree stage in the college.

8- Developing new programs at the bachelor's and master's levels and preparing projects for programs at the doctoral level.

9- Improving scientific research activity in the college to better contribute to the development of the educational system and working to make the College of Education a house of expertise that leads the process of change and renewal in educational work by focusing on strategic educational issues and finding solutions to the obstacles that obstruct the education process.

10- Paying attention to publishing scientific research through developing the college's peer-reviewed scientific journal, and expanding its distribution circle at the regional, Arab, and national levels as well.

11- Achieving an international reputation in the field of educational research by participating in and organizing various scientific forums.

12- Creating new postgraduate programs in the English language and computers departments.

13- Developing laboratories to teach English and Arabic languages and Quranic sciences, in addition to laboratories for the Geography, Kindergarten, Home Economics and Computers Departments.

14- The increase in the number of female students and thus the increase in demand for higher education and the increasing need for renewal and reform in light of future needs and the state's comprehensive plans.

15- Developing the work of faculty members in the college by training them on student-centered teaching models, exploration or problem-centered learning, self-learning, cooperative learning, or dialogue and debate.

16- Adopting a lifelong learning approach by providing and encouraging students to enjoy the learning process and creating internal motivation to keep pace with the requirements of the current and future era.

17- Encouraging faculty members to practice modern methods and make the necessary changes in the teaching methods used to benefit from them for distance learning.

18- Attracting qualified faculty members, maintaining their development and continuity, and sending a number of students to obtain master's and doctoral degrees from many prestigious universities.

19- Providing a special building for the college instead of the current building, designed according to the latest international engineering designs for colleges of education, equipped with spacious, centrally air-conditioned laboratories, courtyards, and classrooms.

#### 4. Program Accreditation

Does the program have program accreditation? And from which agency?  
nothing

#### 5. Other external influences

Is there a sponsor for the program?  
nothing

## 6 Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews•
Institution Requirements				
College Requirements				

Department Requirements	Yes, it is essential			
Summer Training

## 8. Expected learning outcomes of the program

---

### . A- Cognitive objectives

A1/ Identify the types of fabrics suitable for jackets and coats (especially woolen fabrics and how to deal with them), as well as the types of fabrics suitable for occasion and evening dresses.

A2 / Identify the appropriate supplies for fine tailoring, including adhesive fillings of all kinds and their effect on the final shape of the jacket or coat.

A3/ Identify the definitions and terms used in fine tailoring.

A4/ Identify the correct and basic steps for sophisticated and advanced tailoring, represented by jackets, coats, and evening and occasion dresses.

A5/ Identify the preparatory stages for such types of sewing.

A6/ Identify the final steps that have a significant impact on the final appearance of the piece of clothing.

### B - The skills objectives of the course.

B1/ Developing the student's ability to transform information into methods of work and activity in the educational field.

B2/ Developing the student's ability to choose classic designs and decorative methods appropriate to such types of sewing.

B3 / Developing the student's skill in dealing with woolen fabrics, methods of shrinking them, and methods of forming collars and sleeves, etc.

B4- Developing the student's skill by identifying the largest number of modern designs, methods of sewing them, and keeping up with fashion.

### Transferable

- Transferable general and qualifying skills (other skills related to employability and personal development).

D1 / Follows the scientific and technological development in the field of clothing manufacturing, especially high-end clothing and its tailoring.

D2/ Contributes to solving technical problems in the clothing industry.

D3 / Participates in raising the clothing awareness of the family and society.

D4-/ Employing knowledge and skills efficiently in the field of fine tailoring.

### Value

Daily tests

Monthly tests

Reports and studies

---

---

---

## 9. Teaching and Learning Strategies

---

- 1/ Theoretical lectures.
  - 2/ Practical lectures.
  - 3/ Discussing external reports (modern methods and techniques in sewing).
- 

## 10. Evaluation methods

---

- 1/ Theoretical tests.
  - 2/ Practical tests.
  - 3/ Extracurricular activities related to the field of specialization (fashion shows, for example).
-

## 13. The most important sources of information about the program

State briefly the sources of information about the program.

---

Advanced Sewing Binding A. Bushra Fadel Saleh / 2000

The Book of Fine Sewing - Singer Collection / Arabization and Translation Center / 1997

Comparative Clothing Construction Techniques Christine Haynes 2014

Internationally accredited fashion magazines / Burda Fashion Magazine

The relevant websites are [www.Pattern-making.com](http://www.Pattern-making.com)

---

#### 14. Program Development Plan

- 1- The possibility of developing curtain fabrics for evening wear.
  - 2- The effectiveness of using the electronic classroom in teaching advanced sewing for the fourth stage - home economics.
  - 3- The materials used to fill the jacket and their effect on its external appearance.
-

### 8. Course Objectives

#### Course Objectives

- Expanding and developing female students’ theoretical and practical concepts in sewing topics
- Activate the steps for sewing a coat or jacket
- Learn about the specificity of advanced sewing as it is the highest and finest type of sewing

### 9. Teaching and Learning Strategies

Using modern sources to develop and update curriculum vocabulary

### 10. Course Structure

Week	Hours	Required Outcomes	Unit or subject name	Learning method	Evaluation method

1-4	8	The student gets to know	<p>1- Learn about advanced sewing and its required supplies</p> <p>2- The importance of the ironing board and pad in the steps of sewing a jacket or coat 0</p> <p>3- Drawing the template for the ironing pillow on paper, the method of detailing and sewing the ironing piece, how to place the pillow template, and the amount of sewing allowances required for it.</p> <p>4- Detailing the ironing pad and marking the borders of the template</p> <p>5- Identify the material used in filling the pillow and its most important features 0</p> <p>6- How to stuff the pillow, and how to close the filling hole</p> <p>Choosing the design of the jacket or coat, which has a classic design, in addition to choosing the fabric (specifically woolen) because of its properties that can be dealt with, and choosing the lining fabric and all the supplies that the jacket needs.</p>	a lecture	Practical achievement test
5-8	8	The student gets to know	<p>1- Shrinking and modifying the woolen fabric and extracting the jacket or coat template</p> <p>2- Know the basic rules for tailoring a jacket or coat 0</p> <p>3- How to spread the fabric and install the template for detailing, while transferring the signals from the template to the fabric 0</p> <p>4- Choosing the appropriate adhesive filling and determining the basic rules for detailing it and transmitting signals</p> <p>Determine the collar line and install the adhesive padding without gluing. Sewing the collar line and cuffs.</p>	a lecture	Practical achievement test

9-12	8	The student gets to know	<p>1- How to make button holes in fabric</p> <p>2- Tie the pieces of the jacket or coat and prepare them for braiding</p> <p>3- How to determine the collar line of the upper collar and sew the collar</p> <p>0</p> <p>4- Collar stitching</p> <p>5- How to install and install the sleeve pieces</p> <p>Implementing the sewing of the sleeve pieces, how to attach them to the body of the jacket or coat, and attaching the shoulder straps</p>	a lecture	Practical achievement test
13-15	6	The student gets to know	<p>1- How to make and install pleat thickenings</p> <p>2- How to connect the lining fabric pieces</p> <p>3- Execute stitching to connect the lining fabric to each other</p> <p>4- Attach the lining to the jacket or coat by sewing with a sewing machine</p> <p>0</p> <p>Fastening the buttons and securing the folds with clamps</p>	a lecture	Practical achievement test
1-5	10	The student gets to know	<p>Second semester/evening dresses</p> <p>1- Choose an evening dress design (afternoon wear), which is characterized by a design with embellishments</p> <p>2- Extracting the template (dress designs vary annually according to fashion)</p> <p>0</p> <p>3- Choose the appropriate fabric and appropriate decorations</p> <p>4- Modifying the fabric, installing the template on the fabric</p> <p>Identifying the basic rules of detailing and methods of dealing with special fabrics (embroidered, worked, etc.), then detailing the fabric and transferring signals from the template to the fabric.</p>	a lecture	Practical achievement test

6-10	10	The student gets to know	<p>1- Steps for sewing scarves and dealing with them because of their privacy</p> <p>2- Dealing with the steps of sewing the dress for each student individually (due to the variety of designs) Sewing and connecting the pieces of the dress (according to the designs)</p> <p>3- How to install the sleeves (each according to the design): attaching, sewing and installing the sleeves</p> <p>How to make a dress structure using special fillings or supports and installing them 0</p>	a lecture	Practical achievement test
11-15	10	The student gets to know	<p>1- How to install and implement appropriate decoration (The steps for decorating the dress vary according to the type of decoration. Some decorations are preferable to be done in the first stages before attaching the pieces of the dress, while others are in the final stages.)</p> <p>2- How to make neck cuffs (various shapes and designs), how to install sleeves, how to implement neck cuffs, and how to finish them 0</p> <p>A presentation of designs (fashion show) by female students</p>	a lecture	Practical achievement test

## 11. Course Evaluation

This can include notes whether the course is basic or optional.

**Developing the skill of linking acquired knowledge with practical application**  
**Developing the skill of conducting research and reports and drawing conclusions.**  
**- Developing the skill of planning and designing applied activities**

### 7. Program Description

Year/Level	Course Code	Course Name	Credit Hours				
2021-02022	347HENX	Food experiments/practical	<table border="1"> <tr> <td>theoretical</td> <td>practical</td> </tr> <tr> <td>60hour</td> <td>90 hour</td> </tr> </table>	theoretical	practical	60hour	90 hour
theoretical	practical						
60hour	90 hour						

### 8. Expected learning outcomes of the program

*Knowledge*

*Knowledge*

*the student's definition of the ability to distinguish: 1- The importance of water, its behavior in food, and the types of solutions.*

- Identify the components of eggs and their effect on the products that eggs are prepared*
- Identify the components of milk and their effect on the products that milk is prepared*

### 11. Evaluation methods

*Explaining the scientific material and linking the lectures to the practical part*  
*Using a microscope and pictures that remind the student of the scientific material*

### 10. Evaluation methods

- 1- Semester tests.*
- 2- Daily activities and end-of-year exams*
- 3- Research, reports and working papers.*

11. Faculty						
Faculty Members						
Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Teacher	Home economics	Food and nutrition			Staff	

**Professional Development**

Mentoring new faculty members

Briefly describes the process used

**12. Acceptance Criterion**

(Setting regulations related to en admission or others)

**14. Program Development Plan**

A comparative study by introducing the student to the ability to distinguish between diseases caused by microorganisms and what are the ways and means to prevent their spread. The types of bacteria that lead to food spoilage and ways to control the spread of diseases caused by microorganisms.

Week	Hours	Required Learning		Unit or s name	Learning method	Evaluation method
		Outcomes				
	2hours my theory	The student gets to know	Name of the unit or topic		Theoretical lectures and practical applications	Daily activity, monthly, quarterly and theoretical tests and exams
1	2	=	water		Its definition and importance, chemical composition of water	Daily activity, monthly, quarterly and theoretical tests and exams
2	2	=	Physical states of water		and its physicochemical properties, hard water	Daily activity, monthly, quarterly and theoretical tests and exams
3	2	=	Solutions		Definition of solutions, types, and properties	Daily activity, monthly, quarterly and theoretical tests and exams
4	2	=	colloids,		Its definition, name, general properties, precipitation, main colloidal diffusion states in foods, properties	Daily activity, monthly, quarterly and theoretical tests and exams
5	2	=	Emulsions		Its definition, types, factors that affect its formation, theories of the action of the emulsifying agent. Foam, its definition, importance, factors affecting its construction and destruction)	Daily activity, monthly, quarterly and theoretical tests and exams
6	2		eggs		Its nutritional and manufacturing importance, the composition of the shell, yolk and white and their chemical contents	Daily activity, monthly, quarterly and theoretical tests and exams

7	2	=	Gels	Its definition, properties, factors that affect its formation, the phenomenon of separation, factors that affect it	Daily activity, monthly, quarterly and theoretical tests and exams
8-	2	=	Qualitative properties of eggs	Methods of handling and storing it, its functional properties and uses in the kitchen	Daily activity, monthly, quarterly and theoretical tests and exams
9	2		Basic methods for cooking eggs	Products that contain eggs, egg foams, egg preservation	Daily activity, monthly, quarterly and theoretical tests and exams
10	2	=	the milk,	Its nutritional and manufacturing importance, the nature of the organization of its components, types of milk and its products	Daily activity, monthly, quarterly and theoretical tests and exams
11	2	=	Supplementing the types of milk and its products	Cooking milk, thermal pasteurization, whey proteins, effect of heat on casein	Daily activity, monthly, quarterly and theoretical tests and exams
12	2	=	The effect of temperature on the color of milk	The effect of acid in casein, the effect of renin enzyme in it, the effect of polyphenolic compounds on milk proteins and their flavour, homogenized milk and its sensitivity to heat, handling of foods manufactured from milk	Daily activity, monthly, quarterly and theoretical tests and exams

13	2	=	fruits	Its importance, plant tissue structure	Daily activity, monthly, quarterly and theoretical tests and exams
14	2	=	Chemical content of fruits	, fruit smell, changes occurring after picking, enzymatic browning, changes due to cooking.	Daily activity, monthly, quarterly and theoretical tests and exams
15	2	=	Vegetables	Its importance, composition of vegetables and their chemical content	Daily activity, monthly, quarterly and theoretical tests and exams
16	2		What applies to fruits regarding composition applies to them	. Cellularity, tenderness, enzymatic browning, quality characteristics of fresh vegetables	
17	2	=	Meat, its importance and types,	Chemical content and muscular composition of meat	Daily activity, monthly, quarterly and theoretical tests and exams
18	2		Female students application		
19	2	=	Female students application		Daily activity, monthly, quarterly and theoretical tests and exams
20-	2	=	Female students application		

21	2	=	Female students application		Daily activity, monthly, quarterly and theoretical tests and exams

1. Program Vision
The college seeks to graduate academically and pedagogically qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility through various scientific and technical means and methods.
2. Program Mission
Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education.
3. Program Objectives
Raising good generations who will bear the burdens to achieve the comprehensive development of society and complete the building of the girl's personality in an integrated way to acquire knowledge, inclinations, and skills, develop innovative capabilities, and train her to use the scientific method of thinking to confront and solve problems. This is in addition to preparing and building female students to play a positive role in the field of scientific research that contributes to the field of progress. Scientific education in science and arts, to be responsible professionals and members of society, as well as to establish and implement a system to develop all auxiliary academic programs to contribute to community service through continuous interaction between colleges on the one hand and the environment and society on the other hand, with the aim of spreading cultural, social, educational and scientific awareness.
4. Program Accreditation
1- The explanation method 2- The method of discussion 3- Lecture method and application
5. Other external influences

**81. Program Vision**

The college seeks to graduate academically and educationally qualified female teachers and to create an educational generation capable of building and reforming society in socially acceptable scientific and educational fields. It seeks to prepare female teachers capable of assuming responsibility by various scientific and technical means and methods.

**82. Program Mission**

Preparing female students in line with scientific and technical progress, and preparing qualified cadres who possess specialized and professional competencies, continuous development competencies, and community service competencies to work in the stages of higher education and respond to the requirements of the labor market.

**83. Program Objectives**

1. Embodying the vision, mission and goals of the University of Baghdad, and applying the best educational practices with a focus on ensuring and enhancing

quality and performance.

2. Preparing specialized cadres capable of serving the community and preparing for the preparation of future specializations.

3. Spreading the culture of human diversity in society, transferring knowledge and skills, writing academic research, and creative scientific achievement through student- and teaching-focused activities.

4. The college seeks to conclude scientific and cultural cooperation agreements with corresponding colleges and corresponding departments in different colleges to achieve best practices in the fields of teaching, learning and translation.

5. Focusing on the educational and moral aspects of all its members and spreading the spirit of dedication, tolerance, commitment and work to serve the nation.

#### 84. Program Accreditation

Does the program have program accreditation? And from which agency?

#### 85. Other external influences

Is there a sponsor for the program?

#### 86. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements				Basic course
College Requirements	Yes			
Department	Yes			

<b>Requirements</b>				
<b>Summer Training</b>	<b>None</b>			
<b>Other</b>				

\* This can include notes whether the course is basic or optional.

<b>87. Program Description</b>				
<b>Year/Level</b>	<b>Course Code</b>	<b>Course Name</b>	<b>Credit Hours</b>	
<b>2023-2024 / the Fourth</b>	<b>440 HE KM</b>	<b>Nursery management</b>	<b>theoretical</b>	<b>practical</b>
			<b>1hours</b>	<b>2hours</b>

<b>88. Expected learning outcomes of the program</b>	
<b>Knowledge</b>	
Informing students about the importance of managing nurseries and the importance of childhood, especially early childhood	
<b>Skills</b>	
- Expanding the skill of dealing with children and developing the skill of dealing with problems that children may get into	
<b>Ethics</b>	
-Developing students' abilities to share ideas	
- Developing students' abilities to analyze and deduce	

--	--

### 89. Teaching and Learning Strategies

- Explaining the scientific material through the lecture.
- Writing a review paper for the most important ideas presented during the lectures
- Self-learning

### 90. Evaluation methods

Daily, weekly, monthly exams and the end of the year exam.

Preparing reports related to the material

### 91. Faculty

#### Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Professor	Home Economics	Educational Psychology			Staff	

### Professional Development

#### Mentoring new faculty members

Attending theoretical and practical lessons as an assistant teacher with the subject professor to gain experience

#### Professional development of faculty members

Attending scientific courses and workshops

### **92. Acceptance Criterion**

**(Setting regulations related to enrollment in the college or institute, whether central admission or others)**

### **93. The most important sources of information about the program**

State briefly the sources of information about the program.

### **94. Program Development Plan**

- Continuously updating the curriculum and keeping pace with scientific progress in the field of nursery management
- Working to provide all nursery supplies, including indoor and outdoor games
- Providing academically specialized staff to deal with children in the child laboratory
- Encouraging female students to present, deliver, and group discussions
- Expansion of the child laboratory building
